

Impilo Construction (Pty) Ltd Website & Logo Design Project

Prepared By

Mashudu Ralephata

Project Title

Website & Logo Design for Impilo Construction (Pty) Ltd

1. Project Overview

The objective of this project was to design and develop a professional company website and create a corporate logo for Impilo Construction (Pty) Ltd. The solution aims to reflect the company's brand identity, services, values, and commitment to quality construction and infrastructure development in South Africa.

The project was executed using a structured Website Development Life Cycle (SDLC) approach to ensure quality, consistency, and alignment with client requirements.

2. Requirements Analysis

The requirements were gathered from the company profile provided.

Key requirements included:

- Design a modern and professional company logo
- Develop a responsive and mobile-friendly website
- Apply consistent branding and colour scheme
- Present company services clearly and professionally
- Ensure easy navigation and user-friendly interface
- Highlight company values, BBBEE status, and transformation goals

3. Planning Phase

A clear structure for the website was defined to ensure logical navigation and user experience.

Planned Website Structure:

- Home
- About Us
- Services
- Contact Us

Tools & Technologies:

- HTML5
- CSS3
- Bootstrap 5
- JavaScript

4. Design Phase

The design phase focused on creating a modern, professional, and construction-themed interface.

Design Decisions:

- Use of dark corporate colours (navy, gold, white)
- Strong hero section with construction imagery
- Card-based layout for services
- Clear typography for readability
- Mobile-first responsive design approach

Logo Design Approach:

The logo concept was designed to reflect:

- Construction and structural growth
- Professionalism and trust
- South African identity and transformation values

5. Development Phase

The website was developed using front-end technologies.

Implementation Details:

- Built using HTML5 for structure
- Styled using Bootstrap 5 for responsiveness
- Custom CSS used for branding and layout adjustments
- JavaScript used for smooth scrolling and interaction

Key Features:

- Fully responsive layout
- Navigation bar with smooth scrolling
- Service section with icons
- Contact form layout
- Clean and modern UI design

6. Testing Phase

The website was tested across multiple devices to ensure responsiveness and functionality.

Testing Performed:

- Desktop responsiveness testing
- Tablet compatibility testing
- Links for each page sections are working
- Mobile responsiveness testing
- Navigation link testing
- Layout and spacing validation

Results:

The website performs correctly across all screen sizes and maintains consistent branding and usability.

7. Deployment & Deliverables

Deliverables Submitted:

- Fully functional responsive website
- Company logo design
- Source code files (HTML, CSS, JavaScript)
- WDLC documentation (this document)

Deployment Method:

The website is hosted on Vercel.

8. Conclusion

The project was successfully completed following SDLC principles. The final product is a professional, responsive website and logo that aligns with Impilo Construction's brand identity, values, and industry standards.

The solution demonstrates strong attention to design, usability, and technical implementation suitable for a corporate construction company.
